SUMMARY

Senior Flutter Developer with 5+ years building and maintaining production mobile apps across fintech, recruitment, government and consumer products, including a lending app with 500K+ downloads. Strong expertise in Flutter, Dart, Clean Architecture, Bloc and Riverpod, with hands-on experience in financial integrations, performance optimization, production monitoring and App Store / Google Play releases. Experienced in owning mobile apps end to end, from architecture to deployment and maintenance; co-founded and built a local marketplace that reached 2,500+ users and 500+ registered businesses within five months of launch.

EXPERIENCE

Senior Flutter Developer — Vision Dimensions May 2026 – Present · Part-time

- Developing Atlas, a travel and booking app (in development) focused on destination discovery and reservation workflows
- Implementing the Flutter chat experience for the app's AI travel assistant, which suggests destinations and trip plans based on each user's needs

Senior Flutter Developer — Recapet Dec 2024 – Apr 2026

- Owned development and maintenance of core QSalary features (earned wage access app, 40K+ downloads): authentication, financial workflows and deep linking
- Integrated financial APIs and refactored core modules to improve maintainability and scalability
- Investigated and resolved production crashes using Firebase Crashlytics, improving app reliability
- Company closed in April 2026

Senior Mobile Developer — Sulfah (Fintech) Dec 2023 – Nov 2024

- Mobile developer on Sulfah, a lending app with 500K+ downloads
- Implemented secure authentication and sensitive user-data handling; improved performance and stability

Software Team Lead — GatePlus Mar 2023 – Dec 2024 · Part-time

- Built and led a team of 10+ engineers delivering a recruitment system used by multiple companies
- Owned architecture decisions, sprint planning, code reviews and QA processes

Mobile Developer — I-Valley Dec 2022 – Nov 2023

- Built production apps across multiple domains using Clean Architecture

Flutter Developer — Takamol Feb 2022 – Jul 2023 · Part-time

- Developed government apps for the Saudi Ministry of Transport, including tablet-optimized apps

Flutter Developer — SD Solutions Oct 2021 – Nov 2022

- Developed and maintained multiple mobile applications

VENTURES

Co-Founder & Sole Mobile Developer — Dikirnis On Apr 2026 – Present

- Co-founded a local marketplace for Dikirnis, Egypt, and independently developed its two Flutter apps (customer and merchant) covering 10+ sectors: healthcare bookings, commerce, jobs, education, home services, dining and local news
- Grew to **2,500+ users and 500+ registered businesses** within 5 months of the May 2026 launch
- Built a server-driven UI for deeply nested categories: sectors added or reordered from the admin dashboard appear in the app instantly, with no app release
- Built merchant workflows for products and offers, orders, analytics, QR store codes, job postings and applicant messaging
- Owned architecture, Flutter development (Bloc, go_router), .NET REST API integration and store releases · Customer app · Merchant app

Co-Founder & Tech Team Lead — Adrenaline Platform — Jan 2025 – Present

- Lead the cross-functional tech team (Mobile, Backend, DevOps) delivering mobile apps, web platform and admin dashboard
- Run sprint planning, task distribution and the full release lifecycle; improved deployment workflows and stability

KEY PROJECTS

Full case studies with technical decisions: atefelsaeed.github.io/#work

Sulfah — Lending app · 500K+ downloads — Google Play · App Store

- Built iOS Live Activities and deep linking; enhanced onboarding and financial flows

QSalary — Earned wage access · 40K+ downloads — Google Play · App Store

- Built the majority of the app's core features and payment integrations; improved performance and UX

Prime Source (Al-Masdar Al-Awal) — Hajj operations app — Google Play · App Store

- Multi-role app for 5 user types (pilgrim, supervisor, sheikh, doctor, barber): housing, transport and on-site organization, plus Quran, Athkar and Duas
- Cut app size by **65% (250 MB → 85 MB)** by removing duplicate fonts and images, dead code and unused dependencies; re-architected the app and shipped a redesign

Dhahirah Governorate Portal — Government app, Oman (freelance) — Google Play · App Store

- Delivered the official citizen app: news, development projects, events, open data and e-government services

Miqat — Islamic companion app (personal, solo) — Google Play · App Store

- Prayer times with Adhan notifications, Tajweed Mushaf, Quran audio by multiple reciters, memorization with spaced review; free and ad-free

Delta Oil — Field operations app · 1K → 5K+ downloads — Google Play · App Store

- Grew downloads from 1K to 5K+ while improving stability and feature quality

SKILLS

Mobile	Flutter, Dart, Android, iOS (Swift basics)
Architecture	Clean Architecture, MVVM, SOLID, Repository Pattern
State management	Bloc, Riverpod, Provider
Testing & monitoring	Unit, widget and integration testing; Firebase Crashlytics; Sentry
Networking	REST (Dio), GraphQL, WebSockets, Socket.IO, SignalR
Firebase	Auth, Firestore, Cloud Messaging (FCM), Analytics
Navigation & linking	go_router, App Links / Universal Links, iOS Live Activities
Payments	Stripe, Tabby, Tamara, Kashier
Storage	SQLite, Hive, SharedPreferences
Localization	Arabic / English apps, RTL layouts
CI/CD & delivery	GitHub Actions, Codemagic, App Store Connect, Google Play Console
Process	Agile/Scrum, Jira, code reviews, mentoring

EDUCATION & LANGUAGES

B.Sc. Computer Science — Mansoura University, 2015 – 2019
Arabic (native) · English (professional working proficiency)
